

eCommerce Integrations Developer

CrescoData is an exciting market leader in the Commerce space. Headquartered in Singapore, it delivers Commerce-in-the-Cloud services to enterprise customers across the globe.

This is a unique opportunity to work in an agile market-leading company in a fast growing sector and work with large global customers. At Cresco we work hard as an energetic tight-knit team, we hustle, pull together and have FUN! Come and join us on our journey.

Culture

Culture is something that is really important to us at CrescoData. You'll be joining a friendly, inclusive team that values people, growth, development and fun! We regularly run weekly company initiatives like fitness bootcamps, team building days, monthly awards for going above and beyond and team events to reward hard work and a great attitude. Expect to join a unique market leading Singapore company with a global culture and mindset.

We are looking for a Developer to join our skilled Development team and help us build integrations to ecommerce platforms as well as marketplaces and resolve any issues for our varied enterprise size customer base. This is a great opportunity to get exposure to a wide range of APIs, systems and data flows, as well as developing a high level understanding of The CrescoData Tech Stack and associated commerce ecosystem. This role requires a great understanding of APIs and an ability to work with different formats.

All components are run on Amazon AWS, this position will provide great exposure to cloud based technologies and provide an opportunity to work on many components of a platform.

Responsibilities

Projects can include working on the following components:

- Solving technical queries
- Integrating into various APIs
- Changing mappings
- Launching new products and services
- Updating Customer Tech Stacks
- Improve technical workflows
- Ad Hoc tasks on Platform improvement

Skills and Qualifications (Use Style tool, Heading 2)

We'd like you to have the following skills:

- Degree in a relevant field
- Experience with dynamic languages preferably Python
- Experience with Rest APIs
- Experience with Source control such as GIT/SVN

In addition, the following skills would be useful:

- Potential experience with cloud architectures preferably AWS
- Potential experience with serverless/headless components preferably serverless framework and AWS
- Potential experience with templating languages preferably Mako

The successful candidate will have these personal skills:

- Bright, fast-learning and keen on working with new technologies
- Dynamic and self-motivated and able to work in a start-up environment
- Good communication skills
- Team player
- Desire to be mentored and learn from the team

CrescoData offers

- A unique opportunity to work in a high growth start up at the start of its massive ramp up. Opportunity to grow with us!
- On the job training and personal development
- Mentorship and support from experienced, dedicated professionals to help guide your career
- A fun, stimulating work environment
- Flexible working
- Regular team building events (we've been on Cooking Challenges, Kayaking in Bintan, Beach clean with beach games), free Wednesday lunch, free weekly bootcamp and free Friday drinks!

Please send your CV, a covering letter outlining your experience and why you are the best person for this role; to jobs@crescodata.com
