We regularly run company initiatives such as fitness bootcamps, team building days, awards and recognition for going above and beyond and team events to connect and reward our hard work
- Expect to join a unique market leading company with a global culture and entrepreneurial mindset
- Gain invaluable experience of working with a wide range of large Enterprise customers
- We encourage people to think outside of the box and enjoy supporting the growth of people who want to shape their role and future career development

Why You Matter

We are looking for an eCommerce Integration Developer to join our Development team in Singapore who can help us integrate into new eCommerce marketplaces and platforms via API, and continue improving our existing integrations. This is a great opportunity to get exposure to a wide range of APIs, systems and data flows, as well as developing a high level understanding of The CrescoData Tech Stack and associated commerce ecosystem. This role requires a logical and inquiring mind as well as the ability to solve problems to a logical outcome.

All components run on Amazon AWS, this position will provide great exposure to cloud based technologies and provide an opportunity to work on many components of a platform.

Who You Are
- Great understanding of APIs and an ability to work with different formats.
- Experience with dynamic languages preferably Python
- Experience with cloud architectures preferably AWS
- Experience with E-Commerce
- Experience with templating languages preferably Mako
- You have a great ability to simplify complex problems
- You are able to communicate to stakeholders clearly and concisely

What You'll Do

Projects can include working on the following components:

- Working closely with the delivery team with on-boarding of new customers and integrating into new APIs.
- Integrating and supporting various API integrations in the eCommerce, Marketplace, OMS and PIM space.
- Reading API Documentation, integrating into those APIs in a standardized way, and running tests
- Working with a number of different integration methods including RestAPI, GraphQL, sFTP and webhooks.
- Assisting in change requests and bug fixes through the support and delivery teams
- Solving technical queries
- Updating, and improving the Cresco Mapping Language - an internal mapping tool to map data from one format into another
- Improve and document technical workflows

Must-have knowledge of

- Any dynamic programming language (Python/Ruby/PHP/Perl) **- Preferred Python**
- Any databases (Microsoft SQL Server, Oracle, MySql) **- Preferred NoSQL AWS DynamoDB or MongoDB**

Optional

- AWS CloudFormation, Lambda, API Gateway, SQS
- Code management tools
- Django framework

Skills + Qualifications

- Bright, fast-learning and keen on working with new technologies
- Dynamic and self-motivated and able to work in a start-up environment
- Good communication skills
- Team player
- Degree qualified

Tools

- IDE (JetBrains - PyCharm)
- AWS
- Internal Product tools - CrescoData Management Portal & the Cresco Mapping Language
- Jira / Atlassian
- Knowledge base
- Documentation tools
